What is a lawyer - linguist?

A **lawyer linguist** is a professional who combines **expertise** in both **law** and **linguistics**.

Lawyer linguists are employed in areas where **language** plays a **crucial role**, such as **legal translation**, **interpretation**, **language analysis** in **legal contexts**, or **drafting legal documents** in **multiple languages**.

But did you know that **lawyer linguists** can also play a crucial role in **litigation**?

Lawyer linguists often need a **deep and thorough understanding** of both **legal principles** and **linguistic nuances** to **ensure accuracy** and **clarity** in **legal communication** across different **languages** and **cultures**, especially in a **global economy**.

ILETA is the **meeting place** for all **professionals** involved in the **language of law**

ILETA welcomes all **lawyer – linguist members.**
